

New Year, New Smile!

At the beginning of a New Year, we say goodbye to the old and welcome in the new. We make resolutions, and vow to make a fresh start. Maybe you're resolving to spend more time with your family, to work out more or finally get the smile you've dreamed of. While we can't help you out with all your resolutions, Oshins of Smiles would love to help you get that superstar smile that enables you to look and feel your best.

Today, no one should hide their smile from the world, especially when there are ways to straighten, whiten and perfect it. Some of the cosmetic dental procedures we offer are:

Whitening- a safe, effective way to lighten your teeth. The most efficient way to do this is with custom whitening trays and gel obtained in our office.

Bonding- We can blend different shades of composite chairside to match your surrounding teeth making the fillings unnoticeable.

Porcelain veneers- These are custom made thin shells of porcelain which are bonded on your teeth. They can be used to change color, shape, size, length and correct minor alignment. They have good longevity and are strong and resistant to stain and wear.

Invisalign Orthodontic Aligners- These are virtually invisible clear aligners which are worn like retainers and are effective in achieving tooth movement and alignment.

Through cosmetic dental procedures we not only transform your smile but we place importance on making people feel happy, more confident, and proud.

If you're ready for the New Year and for your new smile call our office to set up a complimentary exam and let's see what option is best for you. We look forward to making you look and feel your best. Remember, everyone deserves to smile. Have a happy and healthy new year!

With Oshins of Smiles, Dr. Steven Oshins
