

FADING SUMMER DAYS, TO BRIGHT FALL CHANGES

Guiderland, NY - Summer has already started to fade away, and Fall is knocking on our doors. Pretty soon we will be able to enjoy apple and pumpkin picking again, and the smell of pie baking in the oven. You'll start to notice the leaves on the trees changing colors from natural green, to vibrant colors of red, orange and yellow. Leaves are changing colors because the tree already used its nutrients to prepare itself for the winter months. With that said, our teeth go through a lot of changes as well. What changes have you noticed about your teeth and smile? Is your smile a bright white, or is it fading because of the change in the color of your teeth? Are you proud of your smile, or do you tend to smile without showing your teeth? While the leaves have a purpose to change color, your teeth do not. Our team can speak with you about teeth whitening or give you ideas for a more cosmetic approach. There are a number of solutions, such as veneers, crowns, dental implants or tooth colored bonding, as well as Invisalign to straighten your teeth or close the spaces you may have. One, or more of these solutions can get you back to feeling like you can smile with your teeth again, and Dr. Oshins and his team will be able to guide you in the right direction to gaining this.

Brighten your smile this Fall and show off your teeth again, by calling our office to set up your consultation with Dr. Oshins!

With Oshins of Smiles, Dr. Steven J. Oshins
