

# OUR PATIENTS, STAFF, AND COMMUNITY'S SAFETY.....THAT'S OUR TOP PRIORITY!!

We know that these times are unprecedented, and it may be a while before things get back to "normal". We also know that today more than ever, your safety, our staff's safety, and our community's safety is most important to us. At Oshins of Smiles, we are going to do everything it takes to keep it that way. As always, you can count on us to keep you and your loved ones safe.

Although dental procedures involve close contact, patients do not need to worry, because we have invested in the Extraoral Dental Suction System. We are one of the very few offices in the Capital District to have this powerful suction system. This new technology will help avoid bacterial and viral infections. These machines capture virtually all the airborne particles created during dental procedures. This important technology improves air quality throughout the office, better protecting patients and staff. Some of the other protocols we have put in place to make your visit safer include: Pre-screening every patient; Using hospital-grade hand sanitizers; Pre-procedural antimicrobial rinse for patients; High-level masks and face shields worn by our staff; And thoroughly disinfecting all surfaces and equipment after each patient. We will be offering expanded patient appointments allowing us to do more dentistry in a single visit and family-friendly scheduling which will allow us to see more family members during the same visit.

We are proud of our new protocols and procedures to help ensure your safety in these unprecedented times. Please visit our website at [www.oshinsofsmiles.com](http://www.oshinsofsmiles.com) to see all the steps we are taking to make every visit safe for you and your loved ones. Please do not hesitate to give us a call with any questions or concerns. We look forward to seeing your smiling faces.

With Oshins of Smiles,
